

Are you tired of replacing light bulbs in your exit signs?

Evansville Water & Light is offering its customers an opportunity to purchase new, efficient LED exit signs for only \$12 each.

LED (light emitting diodes) signs are very energy efficient and durable. They consume only 3 Watts of power and last up to 20 years. The signs can be mounted to a ceiling or a wall. They come with two faces, a solid back and chevron knock-outs for use in any location. They come with a battery to light the sign even when the power is off. We recommend consulting your insurance company and the city fire inspector regarding your exit sign needs.

The reduced price on these signs is made possible through our Commitment to Community energy conservation program. Please fill in and return the attached order form with payment to Evansville Water & Light. Allow a minimum of two weeks for orders to be delivered.
